Australia
n-born singer and
songwriter Delta
Goodrem will release
her first U.S. album,
titled Secrets, later

this year. It will feature four new singles, all of which will be released in advance of the album. All four tracks feature co-writer and collaborator (and

“Into The Blue”

singer) Benny Blanco.

“I was nervous and excited to work with Benny,” Goodrem said in a statement.

“His energy and heart are what I admire in music and I couldn’t

wait to get started.
We met in his home studio and I was blown away by the production he has going on. We really found something that connected with each other.”

ADVERTISEMENT

The new album will also feature a cover of “Watch You Go” by “Everybody Loves Raymond” actor Brad Garrett, who Goodrem considers a “dear friend.” “Brad

just sent over the original demo of ‘Watch You Go,’ ” she explained. “I just heard the demos and it was so stunning, I just knew I had to write my own version. I love his

song so much and felt it was such a special moment.” That track will be released as the lead single from Secrets on September 27. “At this point in time I’m going to be singing my own

songs,” Goodrem said. “I’m looking forward to hearing people react to the new music and all the songs I wrote. It’s always fun to release music when you feel in your heart and

your head it's
time." This invention
relates generally to a
turbofan engine and
more particularly to a
reheat turbofan
engine having a fan
duct for controlling
exhaust gas

recirculation. A reheat turbofan engine is a turbofan engine which can be operated with both of its inlets located on the same side of the engine. This concept of having both of the

engine's inlets located on the same side of the engine is known as double flow. For a typical reheat turbofan engine, the fan duct is located on the same side of the engine as

the second inlet,
which in turn is
located on the same
side of the engine as
the first inlet.

Because the second
inlet is located on the
same side of the
engine as the fan

duct, the second inlet
operates in the same
conditions as
